

**Automated Customer Combine For Your Signature Databases**

## Consolidate Duplicate Customer Information

- Know your customer—*Well*
- Dynamic combining of duplicate customers
- Reduce chance of outdated information
- Reduce marketing and notifications costs
- Reduce internet banking costs for duplicated customers
- Customers combined using customized selection criteria. Once customers are matched, additional criteria can be selected to determine which customer information will be retained.
- Different criteria can be used to select personal versus non-personal customers.
- Can be run in report mode to review the results prior to updating your database and will also fulfill auditing requirements.

**What is a common enemy to almost any organization?**

**Lost productivity! Time = Money!**

Let iCombine help keep your errors to a minimum and increase your productivity by keeping your duplicate customer records under control.

*Improve Customer Relationships and Productivity*
