iSwitch EFT Platform™

Test ATM/POS Anytime, Anywhere!

iSwitch EFT Platform™ is a testing platform for Automated Teller Machine (ATM) and Point of Sale (POS) transactions directly for your core backend system.

This is a modern and sophisticated ATM & POS simulator.

iSwitch EFT Platform™ is a browser based system, designed with the latest Windows technology. Supports many POS transactions such as card activation, goods and services with cash disbursements, payments, replenishments, returns, reversals, withdrawals and cash advance. iSwitch EFT Platform™ also supports balance inquiries, deposits, withdrawals, transfers & ATM transactions.

iSwitch EFT Platform™ comes pre-configured with administrator ID, ATM device, POS device and switch settings. Institution specific settings can be defined for each financial institution.

iSwitch EFT Platform™ facilitates research by providing a transaction journal, diverse search capabilities, transaction input inquiry and messaging.

Supports multiple switch providers.

No ATM or POS Hardware required
